Knowledge Transfer	14 September 2026
Effective date	18 September 2026
Revision	v1.1 — 15 September 2026 (Add Record draft + Base screenshots)
Related systems	Lark Base (APN), Lark Docs, Lark Messenger

1. Purpose

This guideline is the written version of the Knowledge Transfer held on 14 September 2026. From **18 September 2026**, all AWS Partner Network (APN) opportunities are submitted in Lark Base — not on the new APN website. Do not create a live customer opportunity in this Base until 18 September. You may practise a **draft** row with **Add Record** (section 5.2) if **Submit** and **Submit_to_AWS** stay unticked.

Base: <https://g-asiapac.sg.larksuite.com/base/Xtx2b48FRabZewsZtqol0lfagOb>

Click-path in the APN folder: [APN opportunity process](#)

2. Why Lark

AWS launched a new APN. That new APN has limits for our team. You type the opportunity in Lark. Lark still sends it to APN. You are using a different door into the same APN — not a second set of books.

3. What you will see

Left side of the Base is the table list. Ignore Client management, Opportunity management, and funding. Those are other work.

Table	What you do
APN Oppt Submission Table	The only table you type into. Draft with Grid + Add Record . Send a new opportunity from Form (or tick Submit on a draft). Watch Sync_Status on Grid .
APN Oppt Status Table	View only. Check AWS_Review_Status (Approved or not) and deadlines. Do not add rows.
Docs	Process guide in the APN folder if you forget a click.
APN AWS Invitations	Sales admin (Vietnam and Indonesia). Referral accept / reject. Extra knowledge for AMs.

Repeat: the only table you add or edit for a normal opportunity is APN Oppt Submission Table. Status is view only. Filter and Add view are optional for your own inbox. Do not leave a messy filter on the shared Grid. Do not rename or delete the shared Grid. Do not click + **New** at the bottom of the left sidebar — that creates a new table, not a draft opportunity.

If you cannot open the Base (no licence / no permission): access is still being provisioned for some Vietnam colleagues. Emma will send access. Until 18 September, use this document. Do not wait on a live submit.

Screenshots (live Base, 15 September 2026)

These are the same screens you open in Lark. Use them to find the click, then work in the Base — not on this PDF.

Figure 1. APN Oppt Submission Table — Grid. Left: APN tables. Top toolbar: + **Add Record** (next to Customize Field). Columns to watch: Action, Submit, Submit_to_AWS, Sync_Status.

	AI AWS_Opportunity_ID	Action	Submit	Submit_to_AWS	Sync_Status
1	027623836	Update	✓	✓	Success
2	027895273	Update			
3	027974460	Create	✓	✓	Success
4	028021100	Update	✓	✓	Success

Figure 2. Close-up of + **Add Record**. Click this to start a draft row. Leave Submit and Submit_to_AWS empty until you are ready to send to AWS. Rows with empty Sync_Status are still drafts.

Figure 3. Submission **Form** (Fill). Use this to send a new opportunity in one step. Stay on Fill, not Edit. Scroll to the bottom and click **Submit**.

4. Which job?

Pick one path. Do not mix Form, Add Record send, Retry, and Update on the same click.

Job	Who	First click
1a. Draft a new opportunity	Every AM	Submission → Grid → + Add Record (leave Submit unticked)
1b. Send a new opportunity	Every AM	Submission → Form → Submit or tick Submit on a draft
2. Change an existing one	Every AM	Only if Status is Approved → Grid → Update
3. Accept a referral	Sales admin (compulsory). Others: extra.	Invitations table. No Form. No Add Record.

Sales admin for referrals: **Michael Nguyen** (Vietnam) and **Alvindo** (Indonesia).

5. Create (first-time opportunity)

Two ways to start a first-time opportunity. **Form** sends in one step. **+ Add Record** saves a draft on the Grid until you tick Submit.

5.1 Send now — Form

- 1 Open **APN Oppt Submission Table** (Figure 1, left list).
- 2 Open the **Form** view. Use **Fill**, not Edit (Figure 3).
- 3 Fill required fields. Follow the format rules in section 9.
- 4 Scroll to the bottom. Click **Submit**.
- 5 Open **Grid**. Watch **Sync_Status** for about **one minute**. Pending becomes Success or Failed.

5.2 Draft — Grid + Add Record

Use this when you are not ready to send to AWS yet (notes, missing fields, or practise before 18 September).

- 1 Open **APN Oppt Submission Table** → **Grid** (Figure 1).

- 2 Click **+ Add Record** on the Grid toolbar (Figure 2). Do not click **+ New** under the table list.
- 3 A new blank row appears. Fill the fields in the row or Side Peek. Action defaults to **Create** — leave it as Create.
- 4 Leave **Submit** and **Submit_to_AWS** unticked. Leave **Sync_Status** empty. That row is a draft. AWS has not received it.
- 5 Come back later, finish the required fields (section 9), then tick **Submit** and **Submit_to_AWS**.
- 6 If **Sync_Status** does not move, set it to **Pending** yourself. Keep Action as **Create**. Wait about **one minute**.

Until 18 September 2026: you may click Add Record to learn the Grid, but do not tick Submit and do not set Pending on a real customer. Do not use Form Submit for a live deal until go-live.

If **Sync_Status** jumps to Pending as soon as you click Add Record, the row was queued for AWS. Fill required fields immediately and watch **Sync_Message**. If you only wanted a draft, untick Submit and Submit_to_AWS and do not leave Pending on a live customer before 18 September.

If Success. AWS has the create. That is not Approved yet. Check **AWS_Review_Status** on the Status table after about **six hours**.

If Failed. Click the Opportunity ID (hover → Open inside / Side Peek). Read **Sync_Message**. Fix only that field. Click **Retry**. Leave Action as **Create**. Do not click Update on a Failed create.

Lark Messenger also sends Success or Failed with the **Sync_Message**. The blue button opens the Base row.

6. Update (stage or requirements changed)

Use this when the opportunity moves stage or the client requirement changed. Not for a draft that was never sent.

- 1 Do not type in the Status table.
- 2 Open the row → Side Peek. Check **AWS_Review_Status**.
- 3 If it is not **Approved**, stop. Also do not Update if Create is still Failed.
- 4 If Approved: edit fields on Submission. Click **Update**. Leave Action as **Update**.
- 5 Wait about **one minute**. Watch **Sync_Status**.

If Failed. Read **Sync_Message**. Fix that field. Click **Update again**. Do not click Retry on an Update.

7. Referral (sales admin)

Compulsory for sales admin. Extra knowledge for account managers. There is no Form and no Add Record. Lark already fetched the AWS invitation row.

- 1 Open **APN AWS Invitations**.
- 2 Find the row (country + engagement title). New ones show invitation status **Pending**.
- 3 Set **Decision** to Accept (or Reject).
- 4 Set **Assignee** to the account manager.
- 5 Set **Sync_Status** to **Pending**. Then wait. Do not skip this step.
- 6 When it lands, **AWS_Opportunity_ID** appears. Status still takes about six hours.

If it Fails: read **Sync_Message**, fix, set Pending again.

8. Two clocks and buttons

After	You wait	You look at
Form Submit, or draft Submit ticks	About 1 minute	Submission → Sync_Status
Success create	About 6 hours	Status → AWS_Review_Status

Success on Submission is not Approved. Do not patch AWS_Review_Status by hand. Add Record with Submit unticked has no clock — it is only a Grid draft.

If this happened	Click	Leave Action as
New Form submit Failed	Retry	Create
Draft sent (Submit ticked) then Failed	Retry	Create
Approved opportunity needs a change	Update	Update
Update then Failed	Update again	Update

If Retry or Update does nothing, set **Sync_Status** to Pending yourself and keep the same Action. A first-time send still uses Form Submit or Add Record + Submit ticks. Action = Update already sets Pending on its own.

9. Format (why rows Fail)

Wrong format is the most common Fail. Read Sync_Message and fix that field.

- Problem / customer need — at least **20 characters**.
- Phone — **E.164**. Example **+601121555525**. Plus, country code, no spaces.
- If Stage is **Launched**, you must have **AWS Account ID**.

10. Existing opportunities

Open opportunities from **2025 to now** will be moved into this Base. Cut-off is **18 September 2026**. That migration is still in progress until go-live. Do not recreate those deals in Lark before then. Migrated rows often sit on the Grid with Action = Update and empty Sync_Status — do not Add Record a second copy.

11. If you are stuck

Ask in the Lark group **APN TroubleShoot**. Always send three things:

- 1 Your Oppt ID
- 2 Your Status (Sync_Status / AWS_Review_Status)
- 3 Your Sync_Message

If the question is which door, when to wait, or the APN flow itself, ask **Eylia +6016-4244515**, or Azib / the APN champions. You will be added to TroubleShoot if you are not in it yet.

12. Go-live

All GAP sales use this Lark Base from **18 September 2026**. Until then, please refrain from live opportunities in this Base.
